goodbright.nz 

Many years of stellar experience as a social innovator, technical architect, developer, founder and machine learning engineer. Co-founder of projects in Finance, AI and now Web3.

Relevant Skills

- Data science (Math, AI, ML, Bayesian models)
- Senior programmer - C#, python, web, mobile
- Deep experience in banking, finance, web3
- Data modeling, social networks and resilience
- Research and technical lead (founding CTO)
- Technical architect with proven track record
- Product owner, UX design, design process
- Innovator in open source, mutual credit projects

Selected Experience

DEC 2020 –

Founder, Cashless

Cashless is a decentralized collective building new forms of resilient, open-source, mutual credit based on a core of peer-to-peer acknowledgements and reciprocity graphs with staking on the blockchain.

NOV 2019 -

AI Lead Dev, Te Hiku Media

Papa Reo is an Iwi led project building speech recognition, language understanding and synthesis for indigenous languages. Doing AI in under-resourced languages means we must build many tools from scratch. I pioneered the speech model and a pronunciation feedback model, presented at NeurIPS 2021.

2002 – 2018

Founding CTO, CreditSights

CreditSights is the leading voice in independent fixed income research on Wall Street. As the founding CTO, I built the tech team, and the flagship financial products – a numerical risk model and a general financial research platform. In 2020, Fitch acquired CreditSights, giving me a significant exit.
